HIGH WATER LEVELS

The International Lake Ontario – St. Lawrence River Board has advised that 10,400 cubic metres of water per second continues to be released at the Moses/Saunders Dam near Cornwall. The flow cannot be decreased due to challenges facing the Great Lakes' shipping industry. Residents & businesses along Lake Ontario & the St. Lawrence can expect high water levels to become the norm in the coming years. The Mayors of municipalities along the River are in the midst of scheduling a meeting with the Board this fall to discuss possible ways to mitigate these problems.

COMMITTEE CORNER

Mallory Coach House Committee

The Mallory Coach House Museum & Archives is open Tues – Sun from 1-4pm. Our students, Callie MacIntyre and Kayleigh Stark would be happy to show you around, or you can take a self-guided tour.

Our volunteers have been busy – the new sign is up and Yonge in Bloom has planted the garden under the sign. New outside lighting is in the works. The underground wires have been laid. Work continues in the glass room and a decision has been made to put up a new fence on the south side of the property. This work will be done in the fall.

The MCH Committee meets the 1st Wednesday of the month at the MCH at 7pm, followed by the meeting for the 1000 Islands River Heritage Society. The MCH Committee looks after the bricks and mortar and the River Heritage group looks after the museum & archives.
